PowerGATE™

Switches & Panels

Power Input Panels

ReadySwitch™ With Manual Transfer Switch

Power Output Panels

Company Switch

Lex Products PowerGATE™ Power Input Panels are generator-ready to provide safe, reliable and convenient access to temporary electricity in power outage and disaster relief applications.

Comply to NEC Article 700, section 700.3 Test and Maintenance requirements by integrating Lex Products PowerGATE™ Power Panels into your Emergency Power System.

Features Include:

- Phase Rotation Monitor
- 2 Wire Auto Start
- Kirk Key Provision

The PowerGATE™ ReadySwitch™ Power Input Panel with Integrated Manual Transfer Switch is cULus 1008 Listed enclosure permanently mounted outside to a building. When paired with a portable generator, it is the most cost effective way to prepare your business or facility for a power outage.

PowerGATE™ Power Output Panels are Fully Listed to UL 891 for Outdoor Use. Save money and time by installing a PowerGATE™ Power Output Panel in conjunction with an agency Listed transfer switch.

- Complete routine backup power system testing by connecting a load bank to the PowerGATE™ Output Panel.
- Access building power without the need for an Electrician
- Renting/ maintaining a portable generator can be costly. Provide a safe and convenient method of distributing building power for exterior use with the permanently installed PowerGATE™ Output panel.
- Providing access to building power when you need it.

The PowerGATE™ Company Switch is space saving, metal enclosure provides both lug style as well as IEC 60309 pin & sleeve or 16 Series Cam-type outputs and is available in both beige and black finishes.

- Connections are protected by a 100% rated electronic trip main breaker.
- Company Switches with Cam-type connections are available in 100, 200 and 400 Amp ratings, with NEMA 1 and NEMA 3R rated enclosures and are cULus Listed. Company Switches with pin & sleeve connections are available in 60 and 100 Amp ratings, in a NEMA 1 rated enclosure and are cULus Listed.

Additional Product Offerings

Lex Products is a leading North American manufacturer of innovative power distribution and control solutions for demanding markets, including entertainment, industrial and the military. Founded in 1989, the company specializes in products designed to withstand rough use and harsh environments. Headquartered in Connecticut, the company also has offices in California, Florida, Michigan and Scotland.

An industry pioneer in innovative power distribution applications, Lex Products introduced the use of rubber enclosures for power distribution boxes to North America, which established a new level of safety in power distribution equipment. The company also instituted new molding technologies and applications for cable assemblies, enabling the development of products of unprecedented durability.

All products are subjected to rigorous testing and designed to meet and exceed the strictest safety codes. Lex Products manufactures a full range of portable and permanent power distribution and control solutions.
